SIRI NELE

SIRI NELE
FARM LANDS, VILLA'S AND PLOTS

PLOT 10
1 FARM LANDS,
FARMHOUSE & POOL

THE VISION

This project is more than just land—it is a curated lifestyle destination designed for those who seek tranquility without sacrificing connectivity. Whether you envision a serene weekend retreat, an organic sanctuary for your family, or a high-yielding tangible asset, this community bridges the gap between luxury living and natural harmony.

“Where Nature Becomes Your Address.”

Invest in Land. Live with Nature. A Green Investment for Generations.

KEY HIGHLIGHTS & DEVELOPMENT POTENTIAL

Investing in managed farmland offers a dual advantage: immediate lifestyle enhancement and steady, long-term capital appreciation.

Immediate Usability: Ideal for custom-built eco-villas, weekend cottages, or private country estates.

Managed Agriculture: High-value timber and organic crop options managed on-site to generate passive long-term returns.

Appreciation Potential: Situated in a rapidly growing corridor, ensuring robust land value growth over time.

Generational Legacy: A tangible, inflation-hedged asset that your family can enjoy today and pass on tomorrow.

COMMUNITY AMENITIES

Clubhouse & Wellness Center: Private lounge, infinity pool, yoga deck, and indoor games.

Organic Farming Zones: Managed fruit orchards, vegetable patches, and seed-to-table dining experiences.

Nature & Recreation: Dedicated walking trails, jogging paths, outdoor barbecue pits, and stargazing decks.

Eco-Conscious Infrastructure: Solar-powered street lighting, rainwater harvesting systems, and organic waste composting units.

24/7 Security: Gated entry points, perimeter fencing, and round-the-clock security personnel.

INFRASTRUCTURE & ACCESSIBILITY

Internal Roads: Wide, well-paved internal roads lined with avenue trees for seamless navigation throughout the estate.

Access Roads: Direct access via a multi-lane highway, ensuring smooth drive ability from the city center.

Utilities: On-site electricity connections, abundant groundwater sources, and high-speed fiber-optic network readiness.
